PLEASE PROVIDE A QUOTATION FOR WORK REQUESTED

I WISH TO CARRY OUT THE WORK MYSELF*

Terms of Pitch Enhancements

- *The park only allows approved contractors to carry out work. We have a selection of contractors that are approved or we may be able to complete work with our maintenance team. Please enquire at the holiday home sales office. NO UNAUTHORISED contractors allowed.
- The installation of timber sheds and storage is prohibited. Only metal or plastic products are permitted. Max Shed/Storage Size 6ft x 6ft. On some occasions larger sheds may be permitted, depending on the pitch size; this is under management discretion.
- Installation of Timber Decking is prohibited. *Decking installations must be carried out only by companies authorised by the park, information of decking is available through the Sales Office at Unity.
- We recommend that an 18" fence is erected tight to the concrete of the neighbouring pitch and that to allow access to your neighbour to maintain the services and to wash the outside of the caravan. Care should be taken when planting out this area.
- **WARNING - Please note there may be service cables underground on your pitch including the garden at varying depths. Therefore DO NOT dig down into the garden under any circumstance**

Please note any work commencing or new items on the pitch prior to authorisation and without applying for Pitch Enhancement approval, may result in the work being removed at the expense of the Holiday Home Owner. Any work approved to be carried out personally by yourself may require risk assessments and public liability insurance to be provided.
